

COMMERCIAL SERIES AEROSOL

**WE USE HIGH
QUALITY PAINT**

OVER 300 000 ORIGINAL (OEM) COLOURS AVAILABLE.

PAINT CONTAINING A CURING AGENT

When a repair requires the addition of a curing agent to the paint, Genicolor offers you the perfect solution with its semi-catalyzed aerosol COMMERCIAL SERIES.

The catalyst, already integrated into the paint inside the can, reaches an adequate level of hardening during spraying.

Since the catalyst is already mixed with the paint, its life is more limited. It must be used within 6 months after the product is manufactured. However, the aerosol may be used several times during this period.

**SAVE BY AVOIDING EXPENSIVE TRIPS TO
THE AUTO BODY SHOP**

COMPARING AEROSOLS

Contains 340 g

BASIC QUALITY All purpose	COMMERCIAL SERIES (Semi-catalyzed) For cars, light trucks, machinery and heavy trucks
Product without curing agent (air dries)	Contains a curing agent
